

APPENDIX D—Northridge, California ZIP Code Map

USGS Community Internet Intensity Map for Northridge (JAN 17 1994)
Magnitude 6.7

Directions:

- 1) Color the Intensity Scale at the bottom of the map...using your color pencils to match the MMI color scale as closely as possible...with a different color for each intensity.
- 2) Then color in the map to reveal which areas had the most shaking in the Northridge earthquake.

Small zip code areas have been combined in many cases and are represented by one zip code. The resulting ShakeMap in this exercise is representative of the actual shaking distribution, but not exactly accurate for each individual zip code.
